

**Product Lifecycle Announcement: General Availability (GA)
June 20, 2006**

Proventia Network Intrusion Prevention System (IPS) GX5008-CF and GX5108-CF

New models in the Internet Security Systems' (ISS) Proventia Network IPS line are now available for immediate shipment. This release brings a new network-centric appliance form factor to the award winning Proventia intrusion prevention product line.

This release includes the following new models:

- Proventia GX5008-CF
- Proventia GX5108-CF

Features and benefits of the new models include:

- **Ports on front of unit.** Makes connecting the Proventia Network IPS to other network gear and managing cabling more convenient.
- **Modular Port Design.** "CF" Models feature four (4) SFP/Mini-GBIC Transceivers to accommodate future network topology changes.
- **LCD interface module.** Simplifies setup by allowing initial network configuration on the front of the unit. The LCD interface also allows administrators to conveniently shutdown or restart the appliance without a terminal connection to the appliance.
- **Smaller and Lighter.** New Proventia Network IPS appliances models are an average 33% shorter in depth and an average of 33% lighter than the previous generation Proventia intrusion prevention appliances, making the appliances more easily mounted into a rack by a single person.
